Supplemental Table 1. Radiological grading scale of radiation-induced lung toxicity (18)

Grade - CT findings
0 - No findings.
1 - Ground glass opacities without fuzziness of the subjacent pulmonary vessels.
2 - The findings may vary from ground glass opacities, extending beyond the radiation field, to consolidations.
3 - Clear focal consolidation ± elements of fibrosis.
4 - Dense consolidation, cicatrisation atelectasis, aerobronchogram and bronchial extension (traction bronchiectasis), significant pulmonary volume loss, and pleural thickening.
