Supplementary Table 1. Exploratory correlations among treatment-intensity variables and quality-of-life summary scores		
Variable 1	**Variable 2**	**Spearman ρ**
Age	QLQ-C30 symptom summary score	0.308
Chemotherapy cycles	Chemotherapy duration	0.435
QLQ-C30 functional score	QLQ-C30 symptom summary score	0.664
QLQ-C30 functional score	QLQ-BR23 functional score	0.927
QLQ-C30 symptom summary score	QLQ-BR23 functional score	0.733

Note: These correlations were exploratory, unadjusted, and not corrected for multiple comparisons. Higher symptom summary scores indicate lower symptom burden. QLQ-C30, European Organisation for Research and Treatment of Cancer Quality of Life Questionnaire-Core 30; QLQ-BR23, breast cancer-specific module
